

Overview for success

Toddlers 2 Teens (T2T)

=

**Better outcomes
Better behavior**

Children, at every developmental stage, experience a wide range of feelings, but understanding them and knowing how to manage them is not easy. Learning about feelings is an important part of a child's development. Managing behavior is also an important skill that children are working on developing. Identifying, understanding, and ultimately dealing successfully with feelings alone will give children an advantage in regard to overall well-being, performance and success in life.

Toddlers 2 Teens (T2T)

Is an emotional literacy tool designed to develop social-emotional intelligence in order to increase behavioral competencies. Social emotional learning involves the nurturing of ones emotional and social skills in order to promote better behavior and future success.

This simple to apply, research-based, interactive process gives you all you need to understand and guide your children toward better behavior and increased social emotional competency at the same time. When children understand the way they feel and how to properly manage their feelings, they are empowered to make better choices, are in a position to learn more effectively and ultimately better equipped for their future.

Do something now, ask Otus how!

T2T is not just for young children though we are happy to introduce to you Otus and the Wise Guys who have been specifically developed to help children ages 0-7. T2T is broken down into the key developmental stages from 0-17. Specific age appropriate content has been developed that will help you and your family immediately begin the journey towards better behavior!
